

BUSHY DOWNS HEREFORDS

— • Est. 1943 • —

55th Annual Hereford Bull Sale

On behalf of
ROBERT & MARIAN PORT

WED 25TH SEPT 2019 12 NOON

VENUE: ON FARM, 660 Ngaroma Rd, Te Awamutu.

34 TOP YEARLING BULLS & 70 2-YEAR OLD BULLS

All bulls are TB Tested and BVD clear and twice vaccinated.

BUSHY DOWNS HEREFORDS

• Est. 1943 •

WELCOME TO BUSHY DOWNS 55th ANNUAL HEREFORD BULL SALE SELLING

34 TOP YEARLING HEREFORD BULLS & 70 2YR HEREFORD BULLS

Sale held undercover • Luncheon Provided.

This year we are offering an outstanding line of exceptionally quiet Hereford bulls.

Bushy Downs have a reputation for attracting repeat clientele that comment on the strong, well marked progeny that as feeder calves regularly fetch top dollar.

Bulls will be transported free of charge (up to 80km) week of sale unless arrangements made prior to sale.

WE ARE PLEASED TO WELCOME CARRFIELDS LIVESTOCK INVOLVEMENT IN THE BUSHY DOWNS HEREFORDS SALE THIS YEAR.

ANIMAL DETAILS

- Commercially farmed bulls on rolling/hill country.
- Easy to handle, exceptional temperament.
- All bulls performance recorded.
- Farmed in large mobs and electric fence trained.
- All bulls are guaranteed to perform.
- Bulls TB tested (negative) on 16th August 2019. Herd Status C8.
- Bulls BVD tested (negative) and vaccinated twice with UltravacBVD. (Annual booster shot required to maintain protection).
- Short gestation and low birth weight bulls available.

STUD DETAILS

Bushy Downs Stud was established in 1943 by Martin Port here on this property. Robert and Marian Port have continued building the stud from the 1970's. The Bushy Downs farm is now managed by Kelvin and Cynthia Port.

Bushy Downs property is 340ha with 45ha in native bush reserve. There is also a 25ha runoff. This year we have wintered over 500 cattle and 1100 sheep. Our stock are grassfed and supplemented with grass silage.

Herd breeding priorities and objectives include having structurally sound cattle with a quiet temperament. We have a focus on fertile animals that will calve easily whilst maintaining good rates of growth. Bushy Downs has been successfully mating heifers to calve at 2 yrs of age since 1989.

SALE
BARN

Bulls with Polled breeding in pedigree noted with a (P) Polled, (S) Scurred or (H) Horned beside their tag number. (J) represents Pure Hereford breeding.

- Bulls will be sold in Pen order and Lot order where possible.
- Bulls will be referenced only by their tag number.
- Lot and tag numbers will be displayed as bulls enter the sale ring.
- Bulls will be put through the ring in pairs of similar size and type. You will be bidding per animal for your choice or the pair.

ESTIMATED BREEDING VALUES (EBVs)

EBV's are the best estimate of an animals genetic merit for each given trait.

CALVING EASE DIRECT EBV - CE DIR (%)

The EBV for direct calving ease indicates the influence of the sire on calving ease in purebred females calving at two years of age. Positive figures indicate better calving ease.

CALVING EASE DAUGHTERS EBV - CE DTRS (%)

The EBV for daughters' calving ease indicates how easily that sire's daughters will calve at two years of age. Positive figures indicate better calving ease.

GESTATION EBV - GL (days)

Is an estimate of the time from conception to the birth of the calf and is based on AI and hand mating records. Lower (negative) GL EBVs indicate shorter gestation length and therefore easier calving and increased growth after birth.

BIRTH WEIGHT EBV - BWT (kg)

Is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200 DAY GROWTH EBV - 200 (kg)

Estimated of the animal's genetic merit for 200 day growth calculated independently of the maternal milk effect.

400 DAY WEIGHT EBV - 400 (kg)

This EBV gives us an estimation of the animal's yearling weight potential.

600 DAY WEIGHT EBV - 600 (kg)

This EBV is an estimation of the animal's genetic potential for growth to 600 days (or 18 months).

MILK EBV - Milk (kg)

The EBV gives us an estimation of the animal's milking potential. The value is calculated from the weaning weights of the animal's progeny and other relatives. The 200 day Milk EBV is calculated independently from 200 day growth.

SCROTAL SIZE EBV - SS (cm)

SS scrotal size EBV (cm) is an indicator of the male fertility in regard to semen quality and quantity. Higher EBV's indicate higher fertility. It is also positively associated with female fertility.

2019 HEREFORD EBV AVERAGES FOR 2017 BORN CALVES

CE DIR %	CE DTRS %	GL days	BWT kg	200 kg	400 kg	600 kg	MILK kg	SS cm
+1.1	+1.2	-0.3	+4.4	+33	+54	+77	+16	+2.0

*BUSHY DOWNS SALE BULLS AVE FOR CE DIR IS +4.6

THE ANSWER TO SUPERIOR ANIMAL
PERFORMANCE IS

STARTING YOU IN THE FACE

Faster liveweight gain. Increased fertility. Superior meat quality.
These are just some of the traits that define the HerefordX advantage.

The science shows that HerefordX steers and heifers hit target weights faster and an extra 15% growth means they command sale yard premiums of a hundred bucks a beast. Cows produce more over a lifetime because they live longer and have a 7% higher pregnancy rate than purebreds.

You can't argue with genetics when it comes to maximising the value of your herd. To find out more about buying a registered Hereford bull, **visit herefords.co.nz/bullsales or talk to your stock agent.**
